### HOW WHITE NOISE BACK-UP ALARMS WORK

White Noise Back-Up Alarms provide the benefits of rich audible tones combined with the familiar sound of traditional warning alarms. They use a narrow array of frequencies resulting in a robust tone that is more easily tracked and yet universally recognized.

**Sound dissipates quickly – No more noise pollution complaints!**

#### WHY USE WHITE NOISE BACK-UP ALARMS?

- These Back-Up Alarms focus sound to the “Danger Zone” immediately behind the vehicle
- The directional warning sound makes them instantly noticeable to anyone (or anything in danger of colliding with the vehicle), all while decreasing or eliminating nuisance noise outside the “Danger zone”. Low environmental impact.
- Industry standard mounting holes
